Notes

HOST_* properties are representing the host I'm connected to and are available without a deviceTRUST client installed on the remote device
 DEVICE_* properties are representing the remote device and are only available if a deviceTRUST client is installed on the remote device
 Native RDP information for the remote device IP address are not available on Windows Phone and iOS

Property Type

Session = This property is a session specific property and is valid for the lifetime of the user session
 Dynamic = This property is a dynamic property and is checked for changes once per minute (can be defined)
 Dynamic (Real Time) = This property is a real time property and gets immediately updated when the value has been changed

⁽¹⁾ Not available on Microsoft Server 2008 R2 when using Remote Desktop Protocol (RDP)

⁽²⁾ Not available when using Remote Desktop Protocol (RDP)

⁽³⁾ The deviceTRUST client is pre-installed in IGEL's own Linux-based operating system IGEL OS (version 10.03.500 or higher) and can be easily activated via the IGEL Universal Management Suite (UMS)
